WABASH'S WAY TO NEW YORK R's Coming Some Time, but This Little Railroad's Not in the Plan.

The story printed in some of the morning

papers yesterday that the Wabash was about to enter New York city over a railroad covering the short distance between Morristown and Essex Falls, N. J., met with a great deal of ridicule in Wall Street. President Ramsey of the Wabash said: "It is perfectly true that the comprehensive plans of Mr. Gould for his railroad system may well contemplate at some time in the future an entrance to this city These plans, however, are not worked out, and, in fact, are most indefinite and will not be even broached for a long time to come. At the present time there is absolutely no project under way for the entrance of the Wabash into New York The stories that this little road in New Jersey is being built in our interest or that we are going to build or use a road from Baltimore to Reading, Pa., are unqualifiedly false."

FINANCIAL AND COMMERCIAL. WEDNESDAY, Aug. 5. Urgent liquidation carried the entire security market down to-day, and there were indications late in the day that the demoralization in stocks was affecting other markets adversely. The cotton market, in particular, broke heavily under what appeared to be vigorous liquidation from clique sources. To the weakness of the general Wall Street situation was attributed the large selling of wheat that took place in the grain market. Sterling exchange rates declined sharply under considerable offerings of bankers' bills, and, in this instance also, there was a disposition to look upon the selling as another reflection of the general financial disturbance. It is worth noting that the continued decline in demand sterling brought the rates for this class of bills down to-day to the lowest figures for this season of the year that they have touched since 1893. At that time we were importing gold, owing to the scarcity of currency. which was bringing a premium of 1 to 3 per cent. The failures were announced of two more New York Stock Exchange houses, neither of them, however, of the first importance. One of these firms has been connected in the Wall Street mind with the Virginia-Carolina Chemical Company, the shares of which company have lately registered very severe price declines. While the announcement of the failure of this house was heard with great regret, it was interpreted in an unfavorable light in regard to the general market. The rallying power displayed after the announcement of each failure was decidedly feeble. It was evident that they were not looked upon from the same point of view as were the failures announced at the time of the last previous market spasm, when prices made a sharp recovery on a general rush by traders to cover short contracts. Selling pressure, representing mingled liquidation and bearish operations, increased, in fact, in the late afternoon

dealings, the lowest prices for a number

of stocks being touched in the last hour

Just before the close there were some ral-

lies from the lowest figures, though most

of them were merely fractional. Selling

pressure was still in evidence at the close.

with extreme feverishness and nervous

ness governing the transactions.

The volume of business in stocks for the day exceeded the million share mark; and there was a large increase in the dealings in the bond department, with materia declines made by many of the prominent bond issues. A long list of new low prices for stocks on the present downward movement was recorded. Among the high priced investment issues, Consolidated Gas was particularly weak, showing a decline at one time of 734 points on top of the drop of 71/2 points which was registered yesterday following the announcement that the company proposed to issue \$6,000,000 of treasury stock. It appeared as if a considerable line of this stock had come upon the market. The forced liquidation of quarters. Among the leading railroad shares that reached new low prices for the movement were St. Paul, Chicago and Northwestern, Delaware and Hudson, Union Pacific, Atchison, Baltimore and Ohio, Louisville and Nashville, Rock Island, Erie and Southern Railway. Great weakness developed in Missouri Pacific, which heretofore during the market decline, has held relatively firm. The United States Steel shares both common and preferred, made new low price records, but some of the best buying of the day was seen in these shares. and they rallied in the final dealings the best of the active issues. The authoritative thereafter as practicable. The authoritative statement that the Steel Corporation in apecifications thereof, and bids or proposals proposer envelopes for their enclosure, form of ds, and all other information can be obtained and better position than it ever has been For turther particulars see City Record, pub-shed at No. 2 City Hall.

By order of the Aqueduct Commissioners exerted a decided influence in checking the were American Sugar Refining, General Electric, Peoples Gas and Tennessee Coa and Iron. It is worth pointing out that, despite that general demoralization, there were quite a number of prominent stock issues which failed by considerable margins to break the bottom prices that they touched last month. Among these stocks may be mentioned Pennsylvania, New York Central, Canadian Pacific, Reading, Illinois Central, Metropolitan Street Railway, Amalgamated Copper and Colorado Fuel and

The London market exhibited weakness for American shares prior to the opening of the local market, and it was reported by the cable advices that the weakness of our market yesterday had exerted a generally depressing influence on the foreign trading. The dealings in the local market on London orders were small. They were estimated at less than 20,000 shares on both sides of the account and, apparently, the arbitrage dealers were exerting caution about conducting dealings. Under the circumstances no attention was paid in the market to ordinary news. Another large number of favorable statements of railroad earnings came to hand, but their publication was unnoticed by the traders. The time money market was quiet. Call money was slightly firmer, advancing at one time to 3 per cent. with the bulk of the loans effected at 21/2
